AFCONA – 3571

Chemical Composition
Modified anionic polydimethylsiloxane emulsion

Product general description
General purpose uses additive to enhance surface properties in water–based coating system.

Product Property
AFCONA – 3571 is a special modified polydimehylsiloxane, to provides the surface properties i.e. better wetting, slip and soft feel.

The advantages of AFCONA – 3571 are:
1) Good compatibility to most of water–based system.
2) Ready–to–use and can be easily mixing with water.
3) Improve surface slip.
4) Gives surface soft–feel.
5) Anti–surface tackiness.

Addition and dosage:
0.1 – 1.0% added to water–based system.

Incorporation
Can be incorporate in any stage of production.

Storage
AFCONA–3571 should be stored in a cool dry place. When kept in an original unopened container, it will keep up to 5 years from the date of manufacture. The expiry date is indicated on the container. As it contains water, thus should be store in plastic or coated container.

Packaging
441 lbs non–returnable plastic containers
