**Product general description**
Synergist additive for phthalocyanine pigments, carbon blacks and organic violets in waterbased systems

**Product Properties**
AFCONA – 6755 is in the same category as AFCONA – 6745. The only difference is that AFCONA-6755 is designed for waterbased systems.

AFCONA-6755 should always be used in combination with one of the AFCONA 4000-series high molecular weight dispersants.

AFCONA-6755 will absorb to the surface of the pigment. The specially modified surface of AFCONA-6755 provides an anchoring spot for the dispersant on the pigment. Thus, it improves the anchoring efficiency of a dispersant, which gives better pigment stability.

This results in:
- stabilized pigment dispersion
- reduced mill base viscosity
- higher pigment efficiency
- reduced flooding problems

**Addition and dosage**
3.0 - 5.0% calculated based on pigment.

AFCONA-6755 should be added to the mill base and pre-dispersed for a short period.

The final grinding process should take place together with the incorporation of the high molecular weight dispersants.

**Storage**
AFCONA-6755 should be stored in a cool, dry place. When kept in its original, unopened container, it will keep up to 5 years from the date of manufacture. The expiration date is indicated on the container.

**Packaging**
22 lb non-returnable containers
