The Dow Chemical Company Ucon LB-385 is a water insoluble polyalkylene glycol (PAG) based on a PO homopolymer. Supplied at 80 cSt at 40°C.

While Ucon LB-385 is a good product, it is Tri-iso Tryline's opinion that GEOlube B-75 is a much better option. GEOlube B-75 is also a water insoluble polyalkylene glycol (PAGs) based on a PO homopolymer. Suitable for use in water insoluble lubricants. Particularly suitable for gear, hydraulic and compressor lubricants. GEOlube B-75 has a pour point of -52°C compared to -37.2°C for Ucon LB-385. Supplied as a low viscosity liquid (76 cSt at 40°C).

Ucon is a registered trademark of The Dow Chemical Company. Tri-iso Tryline does not distribute Ucon LB-385 or other Dow products.
