Dow Voronal 220-56 is a 2000 MW propylene glycol based polyether polyol diol. Pluracol P2010 is suitable for polyurethane coatings, adhesives, sealants, elastomers. OH value: 56 mg KOH/g, 250 cps at 25C.

While Voronal 220-56 is a good product, it is Tri-iso's opinion that Carpenter Carpol PGP-2000 is a much better option. Carpol PGP-2000 is a 2000MW propylene glycol based polyether polyol diol. OH value: 56 mg KOH/g, viscosity: 250 cps at 25C.

Voronal is a registered trademark of The Dow Chemical Company. Tri-iso does not distribute Voronal 220-56 or other Dow products.
