Huntsman Jeffamine D2000 is a 2000 MW primary aliphatic polyether diamine based on polyoxypropylenediamine. Jeffamine D2000 is suitable for use in polyurea coatings, adhesives, sealants and elastomer applications. 247 cps at 25C. Supplied as a light yellow liquid. AHEW: 515

Jeffamine D2000 is an excellent product. However, it is Tri-iso's opinion that Endamine D2000 represents a better value overall. Endamine D2000 is a direct drop-in replacement for Jeffamine D2000, and is also a 2000MW primary aliphatic diamine based on polyoxypropylenediamine.

Jeffamine is a registered trademark of Huntsman Corporation. Tri-iso does not distribute Jeffamine D2000 or other Jeffamine products.
