Huntsman Jeffamine T-5000 is a 5000 MW primary trifunctional aliphatic polyether amine. Jeffamine T-5000 is suitable for use in polyurea coatings, adhesives, sealants and elastomer applications, as well as in epoxy systems. 819 cps at 25°C. Supplied as a clear, almost colorless viscous liquid. AHEW: 952, Equivalent weight with Isocyanates: 1904

Jeffamine T-5000 is an excellent product. However, it is Tri-iso's opinion that Endamine T5000 represents a better value overall. Endamine T5000 is a direct drop-in replacement for Jeffamine T-5000, and is also a 5000MW primary trifunctional aliphatic amine.

Jeffamine is a registered trademark of Huntsman Corporation. Tri-iso does not distribute Jeffamine T-5000 or other Jeffamine products.
