Lubrizol 5139 is an Antiwear (AW) additive based on a zinc dialkyldithiophosphate with oxidation inhibition properties. Suitable for use in metalworking fluids, hydraulic oils, industrial gear oils, engine oils, and for greases.

While Lubrizol 5139 is an excellent product, it is Tri-iso's opinion that Rhein Chemie Additin RC 3048 represents a better value. Although not a direct chemical offset, Additin RC 3048 affords very similar performance. Additin RC 3048 is an Antiwear additive and friction modifier based on primary zinc dialkyldithiophosphate. Contains 9.0% Zn, 16.5% S, and 8.5%, and is cut in 15% mineral oil. Suitable for metal working fluids, hydraulic oils, industrial gear oils, and for greases. Exhibits good hydrolytic stability and antioxidant properties.

Lubrizol is a registered trademark of the Lubrizol Corporation. Tri-iso does not distribute Lubrizol 5139 or other Lubrizol products.
