Lubrizol 5333 is a low color, low odor Extreme Pressure (EP) Additive based on a sulfurized vegetable oil. It provides strong film strength, and is soluble in a wide variety of napthenic, vegetable, paraffinic and synthetic base oils. 10% Sulfur, 700 cSt at 40C. Suitable for metalworking fluids, slide way oils and greases. Lubrizol 5333 outperforms traditional dark sulfurized carriers.

While Lubrizol 5333 is an excellent product, it is Tri-iso's opinion that Rhein Chemie Additin RC 2411 represents a better value. Additin RC 2411 is chemically similar to Lubrizol 5333; Additin RC 2411 is also an Extreme Pressure Additive based on a light color sulfurized triglyceride. 10% total sulfur, <1% active sulfur, 230 cSt @ 40C, Cu-Corr (3h/100C): 1a. Suitable for metal working fluids (cutting and forming), water miscible metal working fluids, slideway oils and greases.

Lubrizol is a registered trademark of Lubrizol Corporation. Tri-iso does not distribute Lubrizol 5333 or any other Lubrizol products.
