Capa™ 3041

Description
- Capa™ 3041 is a very low molecular weight trifunctional caprolactone polyol, in which all of the hydroxyl groups are primary.
- Clear, viscous liquid. Liquid at room temperature.

Applications
- Capa™ 3041 was developed for use in surface coatings.
- As the main polyol in very hard polyurethanes.
- As a chain extender in polyurethane elastomers.

Delivery forms
- 200 kg lacquered mild steel drums
- 200 kg tapered steel drums
- 1000 kg IBC's
- Bulk in molten form

Storage
- Undisturbed packaging as delivered until shortly before use. Storage area should be covered and protected from higher than ambient temperatures at all times.
- For bulk tank storage specific considerations need to be given to cleanliness, materials of construction and prevention of air ingress to the tank, technical advice on a storage tank is available on request.

Sales Specification
- Hydroxyl value, mg KOH/g
- Acid value, mg KOH/g
- Water content, %
- Colour, Hazen

Typical properties
- Mean molecular weight
- Melting point, °C
- Viscosity at 60°C, mPas

Solubility parameters
- The solubility parameter (δ) is 9.34 – 9.43 (cal/cm³)½

Densities
- The typical specific gravity (SG) of the material, measured at 55°C c.f. water at 20°C, is 1.073.

CAS no.: 37625-56-2
HS no.: 3907 99
