While Vanlube 727 is a very good product, it is Tri-iso's opinion that Rhein Chemie Additin RC 3890 is a better value. Additin RC 3890 is a direct drop-in replacement for Vanlube 727. Additin RC 3890 is an Antiwear additive and friction modifier based on a neutral ashless dialkyldithiophosphate. Contains 11.0% S, and 5.0%, and is cut in 0% mineral oil. Suitable for metal working fluids, hydraulic oils, industrial gear oils, engine oils, and greases. Exhibits good hydrolytic stability and antioxidant properties. In metal working applications, Additin RC 3880 enhances the surface finish of the work piece and improves the tool life.
