Technical Data Sheet

Revision Date: 2017-06-30
Name: WANNATE® PM-700

Application

WANNATE® PM-700 is high functionality, high viscosity isocyanate. It can be used in the production of rigid PU foam and polyisocyanurate foams; particularly fit for continuous production of laminated polyisocyanurate slabstock foams. WANNATE® PM-700 can improve cell homogeneity and dimensional stability of foams and the compressive strength vertical to the foaming direction. The flame retardancy of polyurethane and polyisocyanurate foams also shows some improvement.

Typical physical and chemical properties

Package(s)

210L iron drums, 250kg/drum

Storage

Since WANNATE® PM-700 is a reactive chemical, reaction with atmospheric moisture happens easily and leads to the formation of insoluble ureas and carbon dioxide gas, which can result in pressure build-up in closed containers and viscosity increase of the product. Containers must therefore be absolutely dry and carefully sealed after congested with nitrogen.

Containers of WANNATE® PM-700 should be kept properly closed and stored indoors at ambient temperature (15~35°C) in a well-ventilated area. Storage at low temperature (below...
5°C) may lead to some crystallization; this material must, therefore, be protected from frost. If crystallization does occur, the material should be heated by rolling the drum in a hot air oven at 70-80°C to melt it out, and should then be thoroughly agitated before use. Melting in a water bath is not recommended.

Extended storage at temperatures above 50°C is not recommended to prevent from the formation of insoluble solids and viscosity increase.

**Shelf Life**

Under recommended storage conditions, the shelf life of WANNATE® PM-700 is one year since the date of production.

**For more information about safety and environment, please refer to our SDS or contact our customer service center.**

**Version information:**

Date of first issue : June 6, 2013
Date of 1st revise: Feb 6, 2015 Reason for revision : The need of product classification
Date of 2nd revise : May 5, 2015 Reason for revision: A change of company address
Date of 3rd revise : Aug.18, 2015 Reason for revision: Unified the template of TDS
Date of 4th revise: May 31, 2016 Reason for revision: Change of product standard.
Date of 5th revise: June 30, 2017 Reason for revision: Change of company LOGO.
