**Capa™ 3091**

**Description**
- Capa™ 3091 is a polyester triol terminated by primary hydroxyl groups.
- It has a molecular weight of 900 and a typical OH value of 183 mg KOH/g.
- Colourless liquid, easy to process at ordinary temperatures.

**Applications**
- Capa™ 3091 can be used as a dispersion medium for 'liquid colours' in surface coatings and in rigid polyurethane castings, particularly for clear, light-stable materials.

**Delivery forms**
- Supplied in lacquered mild steel drums containing 200 kg net.

**Storage**
- The product should be stored in air-tight containers to prevent moisture pick-up from the atmosphere.

**Typical properties**
- Mean molecular weight: 900
- Melting point, °C: 0-10
- Hydroxyl value, mg KOH/g: 183
- Acid value, mg KOH/g: <1.0
- Water content, %: <0.02
- Viscosity at 60°C, mPas: 165

**Densities**
- The typical specific gravity (SG) of the material, measured at 55°C c.f. water at 20°C, is 1.073.

**Solubility parameters**
- The solubility parameter (δ) is 9.34 – 9.43 (cal/cm³)½.
