Capa™ 4101

Description
- Capa™ 4101 is a tetra-functional polyol terminated with primary hydroxyl groups.
- It has a molecular weight of 1000 and a typical OH value of 218 mg KOH/g.
- Clear liquid at 20°C.

Applications
- Capa™ 4101 is developed for production of high solids coatings where both flexibility and high cross-linking density are required.

Delivery forms
- Supplied in lacquered mild steel drums containing 200 kg net.

Storage
- The product should be stored in air-tight containers to prevent moisture pick-up from the atmosphere.

Typical properties
- Mean molecular weight: 1000
- Melting point, °C: 10-20
- Hydroxyl value, mg KOH/g: 218
- Acid value, mg KOH/g: <1.0
- Water content, %: <0.02
- Viscosity at 60°C, mPas: 260

Solubility parameters
- The solubility parameter (δ) is 9.34 – 9.43 (cal/cm³)½.
