Capa™ 2077A

Description
- Capa™ 2077A is a premium grade polycaprolactone polyester diol.
- It has a molecular weight of 750 and a typical OH value of 150 mg KOH/g.
- Soft white paste.

Applications
- The product has been specifically designed for use in speciality coatings and polyurethane elastomers.

Delivery forms
- Capa™ 2077A is supplied in lacquered mild steel drums containing 200 kg net.

Storage
- The product should be stored in air-tight containers to prevent moisture pick-up from the atmosphere.

Typical properties
- Mean molecular weight: 750
- Melting point, °C: 20-30
- Hydroxyl value, mg KOH/g: 150
- Acid value, mg KOH/g: <0.05
- Water content, %: <0.02
- Viscosity at 60°C, mPas: 85

Solubility parameters
- The solubility parameter (δ) is 9.34–9.43 (cal/cm³) ½.

CAS no.: 36609-29-7
HS no.: 3907 99

Valid from: April 23, 2009
