BASF EFKA SI 2040 (formerly known as EFKA 2040) is a silicone-based defoamer for solvent-based coatings. EFKA SI 2040 prevents the formation of foam and blisters during manufacturing and application. It is also suitable for airless spray, brush, and roller applications. EFKA SI 2040 is a solution of defoaming substances containing silicone.

While EFKA SI 2040 is a good product, it is Tri-iso’s opinion that AFCONA Defoamer 2040 is a much better option. Afcona 2040 Defoamer is a fluorocarbon modified silicone based defoamer for solvent-based coatings. Afcona 2040 Defoamer is a moderate defoamer with minimal side effects, and is recommended for use in medium-viscosity applications applied by spray and brush. Afcona 2040 Defoamer is suited for a wide variety of systems, including low-polar to high polar systems.

EFKA is a registered trademark of BASF. Tri-iso does not distribute EFKA SI 2040 or other BASF products.
