BASF Irganox 1135

BASF Irganox 1135 is a liquid sterically hindered phenolic antioxidant. Irganox 1135 is suitable for use in stabilizing polyurethane flexible foam.

While Irganox 1135 is a very good product, it is Tri-iso Tryline’s opinion that Evernox 1135 represents a much better value. Evernox 1135 is a direct drop-in replacement for Irganox 1135 (same CAS number: 125643-61-0). Everspring Evernox 1135 is a liquid hindered phenolic antioxidant based on benzenepropanoic acid, 3,5-bis(1,1-dimethyl-ethyl)-4-hydroxy-C7-C9 branched alkyle esters. Evernox 1135 is specifically suitable for use in stabilizing flexible slabstock foam. It prevents the formation of peroxides in the polyol during storage, transport, and further protects against scorching during foaming.

Copies of the actual IR Spectra comparisons are available upon request.
