BASF Irganox 1520

BASF Irganox 1520 is a sterically hindered liquid phenolic antioxidant. Irganox 1520 is non-staining, non-discoloring, low in volatility, and stable to light and heat. It is recommended for use in stabilizing thermoplastic elastomers including: BR, SBR, NBR, IR, SBS, and SIS as well as natural rubber.

While Irganox 1520 is a very good product, it is Tri-iso Tryline’s opinion that Evernox 1520 represents a much better value. Evernox 1520 is a direct drop-in replacement for Irganox 1520 (same CAS number: 110553-27-0). Evernox 1520 is a multifunctional liquid sterically hindered phenolic antioxidant based on 4,6-bis(octylthiomethyl)-o-cresol. Evernox 1520 is specifically suitable for use in stabilizing elastomers, plastics, adhesives, sealants, oils, and lubricants. Evernox 1520 provides excellent protection against thermo-oxidative degradation. It is not recommended for use in odor sensitive formulations.

Copies of the actual IR Spectra comparisons are available upon request.
