Huntsman Rubinate 2022 MDI Isocyanate is a member of the Low Functionality Prepolymer isocyanate family. Rubinate 2022 MDI is based on polyether polyols. Rubinate 2022 MDI is supplied at 525 cps at 25C, and is a 2.01 functional.

Huntsman Rubinate 2022 MDI is used in the manufacture of high performance polyurethane materials including RIM-processed and cast elastomers, spray coatings, adhesives and sealants.

While Rubinate 2022 MDI is a good product, it is Tri-iso’s opinion that TRiiSO Endate 2320LV MDI is a much better option. Endate 2320LV MDI is also an all-purpose 4,4 MDI based prepolymer that is 2.01 functional. Like Rubinate 2022 MDI, Endate 2320LV is also supplied at 525 cps @ 25C. Endate 2320LV MDI is recommended for use in the manufacture of high performance polyurethane materials including RIM-processed and cast elastomers, spray coatings, adhesives and sealants.
