Huntsman Rubinate 44 MDI Isocyanate is a highly pure di-functional isocyanate having a white to pale yellow color and is a solid at ambient temperatures. Rubinate 44 MDI is ideally suited for high performance polyurethane elastomer applications, sealants, coatings and adhesives. Rubinate 44 MDI is supplied as a solid at 25°C, and is a 2.00 functional.

While Rubinate 44 MDI is a good product, it is Tri-iso’s opinion that TRiiSO Endate 3350 MDI is a much better option. Endate 3350 MDI is also pure 4,4’ diphenylmethane diisocyanate that is 2.00 functional. Like Rubinate 44 MDI, Endate 3350 is also supplied as a solid @ 25°C. Endate 3350 MDI is recommended for use in high performance polyurethane elastomer applications, sealants, coatings and adhesives.
