Huntsman Corporation Rubinate 9433 MDI

Huntsman Rubinate 9433 MDI Isocyanate is a member of the Liquid Pure MDI isocyanate family. Rubinate 9433 MDI is designed as an alternative to di-functional products such as pure 4,4\(^\text{#39}\); MDI or materials containing elevated levels of 2,4\(^\text{#39}\); MDI. Rubinate 9433 MDI has been modified to remain liquid at ambient temperatures. Rubinate 9433 MDI is supplied at 18 cps at 25C, and is a 2.01 functional.

While Rubinate 9433 MDI is a good product, it is Tri-iso\(^\text{#39}\);s opinion that TRiiSO Endate 3180 MDI is a much better option. Endate 3180 MDI is also liquid pure diphenylmethane diisocyanate that is 2.01 functional. Like Rubinate 9433 MDI, Endate 3180 is also supplied at 18 cps @ 25C. Endate 3180 MDI is recommended for use in numerous applications, such as a precursor for rubber crumb binders and flexible packaging laminating adhesives as well as industrial coatings, construction adhesives and sealants and cast elastomers.
