Huntsman Corporation Suprasec 2004 MDI

Huntsman Suprasec 2004 MDI Isocyanate is a member of the Liquid Pure MDI isocyanate family. These products have been modified to remain liquid at ambient temperatures. Suprasec 2004 MDI is designed for use in numerous applications, such as a precursor for rubber crumb binders and flexible packaging laminating adhesives as well as industrial coatings, construction adhesives and sealants and cast elastomers. Suprasec 2004 MDI is supplied at 15 cps at 25C, and is a 2.01 functional.

While Suprasec 2004 MDI is a good product, it is Tri-iso’s opinion that TRiiSO Endate 3280 MDI is a much better option. Endate 3280 MDI is also modified diphenylmethane diisocyanate with a clear to slightly hazy appearance. This product is designed as an alternative to di-functional products such as pure 4,4™ MDI or materials containing elevated levels of 2,4™ MDI. Like Suprasec 2004, Endate 3280 is also supplied at 15 cps @ 25C.
