Huntsman Suprasec 9114 MDI Isocyanate is a member of the Polyurea Prepolymer isocyanate family. Suprasec 9114 MDI is designed to be used in combination with resin blends containing polyetheramines and/or polyether polyols for the production of high-performance polyurea coatings and elastomers. Suprasec 9114 MDI contains a small amount of propylene carbonate to control reactivity and viscosity. Suprasec 9114 MDI is supplied at 475 cps at 25C, and is a 2.04 functional.

While Suprasec 9114 MDI is a good product, it is Tri-iso's opinion that TRiiSO Endate 1510 MDI is a much better option. Endate 1510 MDI is also a polyurea prepolymer that is 2.04 functional. Like Suprasec 9114 MDI, Endate 1510 is also supplied at 475 cps @ 25C. Endate 1510 MDI is recommended for use in the polyurea applications such as industrial maintenance, secondary containment and geotextiles.
