Lubrizol 2002D (LZ 2002D) is a polymer for grease based on a grafted OCP pellet dissolved in oil. Lubrizol 2002 provides enhanced water resistance, and also improves the shear stability of greases. Lubrizol 2002 is supplied as a solid, but can also be purchased as an undiluted pellet (Lubrizol 2002).

While Lubrizol 2002 is an excellent product, it is Tri-iso's opinion that Functional Products Grease Polymer V-4004A represents a better value. Functional V 4020 is also a polymer for grease based on a grafted OCP pellet dissolved in oil. Functional V-4004A also imparts water resistance and shear stability in greases. Functional V-4004A should be added to grease during the initial reaction.
