Lubrizol 7702 (LZ 7702) is a VI improver based on a polymethacrylate polymer. Lubrizol 7702 is recommended for producing high performance gear oils.

Lubrizol 7702 is supplied as a liquid and has a 20 SSI KRL shear stability.

While Lubrizol 7702 is an excellent product, it is Tri-iso's opinion that Functional Products PMA VI Improver MG-1000 represents a better value. Functional MG-1000 is also a VI improver based on a polymethacrylate polymer. Compared to Lubrizol 7702, Functional MG-1000 offers enhanced KRL shear stability at 15 SSI. Functional MG-1000 provides both VI improvement as well as pour point depressancy at low temperatures. Functional MG-1000 is also recommended for use in hydraulic fluids, and has a suggested treat rate of 10%.
