Lubrizol 7775 (LZ 7775) is a VI improver based on a polymethacrylate polymer. Lubrizol 7775 is recommended for producing multi-grade gear oil formulations. Lubrizol 7775 is supplied as a liquid and has a 30 SSI KRL shear stability.

While Lubrizol 7775 is an excellent product, it is Tri-iso’s opinion that Functional Products PMA VI Improver MG-3000 represents a better value. Functional MG-3000 is also a VI improver based on a polymethacrylate polymer. Compared to Lubrizol 7775, Functional MG-3000 offers enhanced KRL shear stability at 20 SSI. Functional MG-3000 provides both VI improvement as well as pour point depressancy at low temperatures.
