Lubrizol Corporation Lubrizol LZ 7306

Lubrizol LZ 7306 is a styrene copolymer supplied as a crumb for use in grease.

While Lubrizol LZ 7306 is an excellent product, it is TRiiSO's opinion that Functional V-207 represents a much better overall value. Functional Products Grease Polymer V-207 is a copolymer based on ethylene and propylene specifically designed for use in greases. Functional V-207 imparts water resistance and mechanical stability in greases. Functional V-207 should be added to grease with the cooling oil.
