Section 1: Product and Company Identification

Product Name: ADDOCAT PV 88D
Article Number: 1594293
Chemical Family: Tertiary Aliphatic Amine
Chemical Name: bis(2-dimethylaminoethyl)(methyl) amine
Synonyms: Pentamethyldiethylene triamine

Section 2: Composition/Information on Ingredients

HAZARDOUS INGREDIENTS

Section 3: Hazards Identification

EMERGENCY OVERVIEW

DANGER! Corrosive. Toxic. Combustible. Color: Colorless to Yellow Form: Liquid Odor: Ammonia-like
May cause eye, skin, and respiratory tract burns. Harmful if inhaled or ingested. Causes respiratory tract irritation. Causes skin irritation. May be fatal if absorbed through skin. Skin sensitizer. Causes eye irritation. May cause a temporary fogging of the eyes. Harmful if swallowed. Vapors or mist may be a fire and explosion hazard when exposed to high temperature or ignition. Ground containers and equipment before transferring to avoid static sparks. Water may cause frothing. Use cold water spray to cool fire-exposed
containers to minimize the risk of rupture. Toxic gases/fumes are given off during burning or thermal decomposition. Closed container may explode under extreme heat.

**POTENTIAL HEALTH EFFECTS**

**Route(s) of Entry:** Inhalation, Skin Contact, Eye Contact

**HUMAN EFFECTS AND SYMPTOMS OF OVEREXPOSURE**

**Inhalation Hazards**

**Acute Inhalation Hazards:** This product may cause irritation of the respiratory tract and mucous membranes of the nose and throat. Inhalation of the vapors results in coughing, choking and possible burns of the mucous membranes. In some cases, pulmonary edema may develop, either immediately or more often within a period of 5-72 hours.

**Chronic Inhalation Hazards:** Depending on the concentration and duration of exposure, repeated and/or prolonged exposure may cause inflammatory and ulcerative changes in the mouth and possibly bronchial and gastrointestinal disturbances.

**Skin Hazards**

**Acute Skin Hazards:** Direct contact may cause severe irritation, pain or local discomfort. Contact may lead to burns associated with severe reddening and swelling of the affected area. May cause sensitization by skin contact. May be absorbed through the skin in toxic (fatal) amounts.

**Chronic Skin Hazards:** Repeated and/or prolonged contact with this product may cause dermatitis or other allergic skin reactions. May be absorbed through the skin in toxic (fatal) amounts.

**Eye Hazards**

**Acute Eye Hazards:** Exposure to vapor or solution causes severe irritation and possible burns. The amine vapors are irritating and have been reported to cause transient fogging of the eyes or corneal edema. Initial symptoms may be discomfort, tearing and/or blurring of vision, "halo-vision". Permanent eye damage including blindness may result if there is a delay in flushing product from the person's eyes.

**Chronic Eye Hazards:** Effects are expected to be similar to those listed above for acute eye exposure. In addition to effects listed in acute exposure, repeated or prolonged contact may result in conjunctivitis.

**Ingestion Hazards**

**Acute Ingestion Hazards:** This product if ingested will cause severe gastrointestinal distress. May cause pain and severe burns of the mucous membranes of the nose, mouth, throat and esophagus. There may be discoloration of the tissues. Swallowing and speech may be difficult at first and then almost impossible. The effects on the esophagus and gastrointestinal tract may range from irritation to severe corrosion.

**Chronic Ingestion Hazards:** None reported for this product as a whole, expected to be similar to those listed for acute ingestion.

**Carcinogenic Components:**

**NTP:** None
IARC: None
OSHA: None

Medical Conditions Aggravated by Exposure: May aggravate existing skin disorders.

Section 4: First Aid Measures

First Aid for Eye: Call a physician immediately. In case of contact, flush eyes with large quantities of water for at least 15 minutes. The eyelids should be held apart during irrigation to ensure thorough flushing of all eye tissue.

First Aid for Skin: In case of skin contact, wash affected areas with soap and water. Call a physician immediately. Immediately remove contaminated clothing and shoes.

First Aid for Inhalation: If breathing is difficult, give oxygen. Call a physician immediately. If not breathing, give artificial respiration. If inhaled, remove to fresh air.

First Aid for Ingestion: Give victim one or two glasses of water or milk. If material is ingested, do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Get medical attention.

Note to Physician: For inhalation, consider oxygen. Inducing vomiting is contraindicated because of the irritating nature of the product.

Section 5: Fire Fighting Measures

Flash Point: 171 °F (77 °C) DIN 51758

Flammable Limits:
- Upper Explosion Limit (UEL %): Not Established
  Pentamethyldiethylenetriamine 5.7
- Lower Explosion Limit (LEL %): Not Established
  Pentamethyldiethylenetriamine 1.1

Auto-ignition Temperature: 311 °F (155 °C) DIN 51794

Extinguishing Media:
- Suitable: Water, Carbon Dioxide, Dry Chemical, Foam

Special Fire Fighting Procedures: Full emergency equipment with self-contained breathing apparatus and full protective clothing should be worn by firefighters. Use cold water spray to cool fire exposed containers. Material supports combustion. During a fire, irritating and toxic gases may be generated by thermal decomposition or combustion.
Section 6: Accidental Release Measures

Spill or Leak Procedures: Extinguish all ignition sources. Emergency clean-up personnel should wear appropriate protection when entering the spill area for clean-up. Do not allow spilled or released material to enter ground water, waste water or soil. Notify local health authorities and other appropriate agencies if such contamination should occur. Place in properly marked containers for disposal. Vermiculite absorbent can be spread over the spill area to absorb as much of the remaining product as possible. Scoop up solid absorbent for waste disposal. Spill area can be washed with water. Ventilate area to remove vapors.

Other Accidental Release Notes: Rhein Chemie requires that CHEMTREC be immediately notified (800-424-9300) when this product is unintentionally released from its container during its course of distribution, regardless of the amount released. Such notification must be immediate and made by the person having knowledge of the release. Distribution includes transportation, storage incidental to transportation, loading and unloading.

Section 7: Handling and Storage

Storage Temperature:
- Minimum: 57 °F (14 °C)
- Maximum: 77 °F (25 °C)

Special Sensitivity: Moisture.

Handling/Storage Precautions: Handle in accordance with good industrial hygiene and safety practices. Keep away from heat, sparks and flames. Keep container tightly closed when not in use. Avoid contact with skin or clothing. Avoid breathing dusts, vapors or mists. Do not reseal container if contamination is suspected.

Section 8: Exposure Controls/Personal Protection

Personal Protection Equipment

Eye Protection Requirements: Contact lenses should not be worn., Chemical safety goggles, full-face shield., Safety glasses with side shields or goggles are recommended.

Skin Protection Requirements: Permeation resistant gloves (neoprene, nitrile, or PVC) and impervious clothing (long sleeve shirts) are recommended., Barrier creams may be used but their use should be kept to a minimum.

Ventilation Requirements: Use local exhaust ventilation if dusting or misting is a problem, to maintain air levels below the recommended exposure limit.
**Respirator Requirements:**

The specific respirator selected must be based on contamination levels found in the workplace, must not exceed the working limits of the respirator and be jointly approved by the National Institute for Occupational Safety and Health and the Mine Safety and Health Administration (NIOSH-MSHA). Air purifying respirator equipped with a full-face organic vapor and dust/mist cartridge if vapors are near or exceeding the exposure limits listed in Section 2. In areas of high concentrations, confined space or other poorly ventilated areas and for large spill clean-up sites, fresh air-line respirators or self-contained breathing apparatus should be used. Observe OSHA regulations for respirator use (29 CFR 1910.134.)

**Additional Protective Measures:**

Safety showers and eyewash stations should be accessible to the work area. Employees working with this product should not eat, drink, or use tobacco products in the work area.

Section 11: Toxicological Information

Toxicity Data for ADDOCAT PV 88D
Toxicity Note: No data available for this product.

Toxicity Data for Pentamethyldiethylenetriamine
Acute oral toxicity: LD50 = 1,330 mg/kg (Rat)
Acute dermal toxicity: LD50 = 230 mg/kg (Rabbit)
Eye Irritation: Severely irritating (Rabbit)
Skin Irritation: Corrosive (Rabbit)

Section 12: Ecological Information

Ecological Data for ADDOCAT PV 88D
Ecological Note: No data available for this product.

Ecological Data for Pentamethyldiethylenetriamine
Fish Toxicity: 220 mg/L, 96 hrs. Ide, silver or golden orfe (Leuciscus idus)
Biodegradation: < 20 %

Section 13: Disposal Considerations

Waste Disposal Method: Disposal must be in compliance with federal, state and local environmental control regulations. If incinerated, toxic and corrosive combustion gases must be properly handled.

Empty Container Precautions: Empty container retains product residue and can be hazardous. Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat, flame, sparks, static electricity, or other sources of ignition. Recondition or dispose of empty container in accordance with government regulations.

Section 14: Transportation Information

Technical shipping name: Pentamethyldiethylene Triamine

Freight Class
Bulk: Chemicals, N.O.I. (NMFC 60000)
Package: Chemicals, N.O.I. (NMFC 60000)
Product Label: Product Label Established
Domestic Surface Transportation (DOT)
Proper Shipping Name: Corrosive Liquids, Toxic, N.O.S.
Hazard Class or Division: 8, 6.1
UN/NA Number: UN2922
Packing Group: II
Hazard Label(s): Corrosive, Toxic
Hazard Placard(s): Corrosive, Toxic

Marine Transportation (IMO / IMDG)
Proper Shipping Name: Corrosive Liquid, Toxic, N.O.S.
Hazard Class Division Number: 8, 6.1
